Ordering Information

- ⦿ Each component can be ordered separately.
 - ⦿ Add the material designator as a prefix, cleaning and packaging designator as a suffix to the basic ordering number to get the complete ordering number.
 - ⦿ Cleaning and Packaging
 - a. Standard Cleaning and Packaging Process (FC-01) for general industrial procedures. No suffix is needed.
 - b. Special Cleaning and Packaging Process (FC-02), to ensure compliance with product cleanliness requirement as stated in ASTM G93 Level C. Add "-F2" as a suffix when needed.
 - c. Ultra High Purity Process (FC-03) is applied to products with wetted surface roughness finished to an average of Ra 5 $\mu\text{in.}$ (0.13 μm). Add "-F3" as a suffix when needed.
- Example: For 1/2" 316L SS VAR gland with Ultra High Purity Process (FC-03), the complete ordering number is 6LV-G-FR8-TB8-6-F3.

Installation Instructions

1. Assemble the gland, nut, gasket and male nut as below. Finger tight the nut.

2. For fittings with 316L SS and nickel gaskets, tighten the nut 1/8 turn with a wrench while holding the male nut or the fitting body steady. Tighten the nut 1/4 turn for those with copper gaskets.

Cautions

- ⦿ Dimensions are for reference only and are subject to change
- ⦿ Over-tightening will damage the sealing beads and lead to possible leak
- ⦿ Utilize a new gasket for each assembly
- ⦿ Tungsten Inert Gas Welding (TIG) is recommended
- ⦿ Always apply sealing materials compatible with the fluid on tapered pipe threads
- ⦿ Do not loosen or tighten fittings when the system is pressurized
- ⦿ Integral FR fittings must remain stationary during installation. Integral male FR fittings should not be paired with integral female FR fittings. Instead, they should be used in conjunction with rotating nuts and glands

FR Size (in.)	Basic Ordering Number	Size in. (mm)		Orifice E Size Range (in.)
		Tx	E	
1/4	-GT-FR4-A-UP-R***	0.50 (12.7)	***	0.0015 ~ 0.035

1. Gaskets are used with retainers.
2. Retainer material is 316L SS.
3. *** indicates ruby orifice sizes, such as 012, which means an orifice size of $\Phi 0.012$ " (012/1000") (only in inch).
Example: 6L-GT-FR4-A-UP-R012. Orifice sizes are available in 0.0005" increments.
For more specifications, please contact FITOK.
4. When using the ruby orifice restriction gasket, it is recommended that the ruby side faces the gas inlet to enable more stable and uniform flow.
5. The maximum working pressure of the ruby orifice restriction gasket is 145 psig (10 bar). For use in working conditions with higher pressure requirements, please contact FITOK.

High-Flow Connections - "H" Type FR Fittings

"H" type FR Fittings connections with high flow capacity are compatible with regular FR connections. Gasket retainer assemblies are recommended to minimize flow resistance.
